

PINEYWOODS HEART

Dr. Hannah Deppisch, M.D.

4800 NE Stallings DR., Ste. 115 Nacogdoches, TX 75965

Office: (936) 305-5102 Fax: (936) 309-0083

Pineywoods Heart makes available the average prices for many of its office services and testing in order to assist you in making informed health care decisions. Prices below reflect the **HMO cash price per item, when paid up front, prior to receiving services**. Please note that the actual amount billed to a patient may differ from the averages below for many reasons, including, but not limited to, specifics regarding a patient's medical illness or condition. Precise payment information related to your individual situation is only obtainable by contacting Pineywoods Heart directly.

New Patient Office Visits

LOW COMPLEXITY ASSESSMENT **\$50**
Involves detailed assessment of a new patient using low-complexity medical decision-making.

MODERATE COMPLEXITY ASSESSMENT **\$75**
Involves comprehensive assessment of a new patient using moderate-complexity medical decision-making.

HIGH COMPLEXITY ASSESSMENT **\$100**
Involves comprehensive assessment of a new patient using high-complexity medical decision-making.

Established Patient Office Visits

LOW COMPLEXITY ASSESSMENT **\$25**
Involves detailed assessment of an established patient using low-complexity medical decision-making.

MODERATE COMPLEXITY ASSESSMENT **\$40**
Involves comprehensive assessment of an established patient using moderate-complexity medical decision-making.

HIGH COMPLEXITY ASSESSMENT **\$70**
Involves comprehensive assessment of an established patient using high-complexity medical decision-making.

In-Office and Ancillary Cardiac Tests

Please visit with your physician regarding benefits and appropriateness of testing for your specific medical situation.

ELECTROCARDIOGRAM (known as ECG or EKG) **\$18**
Involves the evaluation of the heart's electrical activity at rest.

SINGLE-CHAMBER PACEMAKER DEVICE CHECK **\$30**
Involves interrogating and testing the function of a pacemaker with one lead.

DUAL-CHAMBER PACEMAKER DEVICE CHECK **\$40**
Involves interrogating and testing the function of a pacemaker with leads in two chambers.

MULTIPLE-LEAD PACEMAKER DEVICE CHECK

Involves interrogating and testing the function of a pacemaker with multiple leads (e.g. lead locations would include the right atrium, right ventricle, and coronary sinus). **\$50**

SINGLE-CHAMBER DEFIBRILLATOR DEVICE CHECK

Involves interrogating and testing the function of a defibrillator with one lead. **\$45**

DUAL-CHAMBER DEFIBRILLATOR DEVICE CHECK

Involves interrogating and testing the function of a defibrillator with leads in two chambers. **\$55**

MULTIPLE-LEAD DEFIBRILLATOR DEVICE CHECK

Involves interrogating and testing the function of a defibrillator with multiple leads (e.g. lead locations would include the right atrium, right ventricle, and coronary sinus). **\$65**

Cardiac Stress Test

Please visit with your physician regarding benefits and appropriateness of testing for your specific medical situation.

TREADMILL

Involves exercising on a treadmill with simultaneous monitoring of the electrical activity of your heart. This is one type of "stress test" that may be performed on the heart and also provides an assessment of exercise capacity. This is a reasonable test for some patients, but the least sensitive for the detection of coronary artery disease. **\$83**
